"If you understand my silence you will understand my words"

Press Release regarding the celebration of Independence Day of the Earth

May the peace of God be with you. As I informed already, the Earth is under the reign of God for the last four years. Please note that 21st October 2009 is 4th anniversary of the day of the independence of the Earth (5th Independence day of the Earth) and the day on which the Christian church achieved the declared mission of the church. In this occasion I exhort the entire people of the earth to celebrate it. I also exhort to observe an EARTH HOUR from 8.30PM to 9.30PM on 21st October 2009, by switching off all lights in your house and establishments. I also request everybody to meditate about the words in **Revelation 22:5**, which says **“And there shall be no night there; and they need no candle, neither light of the sun; for the Lord God giveth them light: and they shall reign forever and ever”**, which is possible now. Please note that in connection with climate change, we observed an earth hour on 28th March 2009. But we have to understand that all biological processes are the combined work of two worlds (Spirit and Body), and through God (which is the source of Life) only, all will be working together as a single body. We have to recognize that the present world, where we were living, had entered in to the deep subterranean fire, was one of the reasons why the climate change problems were raising. Now God declared end from the beginning and taking us to the kingdom of heaven as promised by God in the Bible and we need to get transformed in to the new world which is going to come in both worlds. Please understand that the inevitable end of world can only be avoided if we work together with God through the understanding of both worlds and working together with Lord and God. I also request all people of the earth should celebrate with full heart and enjoyment on 21st October 2009, by giving thanks and praise to God for giving such a wonderful day - which also was the declared mission and vision of the Church - considering this day as the independence day of the earth. I also request all to conduct worship meetings in all churches, temples, mosques etc. and convene meetings to commemorate the independence day of the earth.

With love and regards,

H. H. & H. M. **Reji M. Issac**
